About Me

Engineer building agentic AI systems in Python.

Tech Stack

Python, FastAPI, LangGraph, LangChain, PostgreSQL, Redis, Docker, GCP, Git

Internships

Backend Intern, ShopStack | Jan 2025 – Jun 2025

- Developed async FastAPI services with PostgreSQL and SQLAlchemy handling 2M requests/day
- Containerized services with Docker and set up CI/CD with GitHub Actions

Things I've Built

Multi-Agent Support Copilot | Python, LangGraph, FastAPI, PostgreSQL, Redis

- Built a LangGraph multi-agent workflow (planner, retriever, executor) with tool calling against order and refund APIs
- Implemented hybrid search with pgvector embeddings and re-ranking over 40k support tickets
- Persisted agent state with PostgreSQL checkpoints; Redis caching cut p95 latency from 4.1s to 1.3s
- Added an evaluation pipeline with RAGAS and a 200-question golden set that runs in GitHub Actions
- Async FastAPI service with retries, timeouts and structured logging; deployed on GCP Cloud Run using Docker

MCP Tool Server for Code Search | Python, FastAPI

- Implemented a Model Context Protocol server that exposes repository search and file tools to LLM agents
- Added rate limiting, caching of repository indexes and integration tests with pytest

Academics

B.Tech Computer Science, Example Institute of Technology | 2022 – 2026 | CGPA 8.5
