SUMMARY

Backend-focused student working on retrieval systems.

TECHNICAL SKILLS

Python, LlamaIndex, LangChain, Qdrant, FastAPI, SQL, Docker, AWS

PROJECTS

DocuMind — document Q&A platform | Next.js, FastAPI, LangChain, Pinecone, Docker

- Built an end-to-end RAG product: Next.js frontend, FastAPI backend and Pinecone vector search
- Implemented document ingestion with chunking, embeddings and metadata filters per workspace
- Streamed answers over websockets and stored chat history in PostgreSQL; deployed with Docker on AWS

Inventory Management API | Python, Django, PostgreSQL

- Developed REST APIs with Django REST Framework for stock tracking across 12 warehouses
- Wrote unit tests with pytest and added Celery jobs for nightly stock reconciliation

EDUCATION

B.Tech Computer Science, Example Institute of Technology | 2022 – 2026 | CGPA 8.1
