About Me

Backend-focused student working on retrieval systems.

Tech Stack

Python, LlamaIndex, LangChain, Qdrant, FastAPI, SQL, Docker, AWS

Internships

Backend Intern, ShopStack | Jan 2025 – Jun 2025

- Developed async FastAPI services with PostgreSQL and SQLAlchemy handling 2M requests/day
- Containerized services with Docker and set up CI/CD with GitHub Actions

Things I've Built

Course Notes RAG Assistant — Python, LlamaIndex, Qdrant, FastAPI

- Designed an ingestion pipeline that parses lecture PDFs, applies semantic chunking and stores embeddings in Qdrant
- Exposed retrieval and answer endpoints through FastAPI with async request handling
- Evaluated answer faithfulness with an LLM-as-judge harness over 150 labelled questions

LLM Evaluation Harness | Python, DeepEval, asyncio

- Built an evaluation pipeline comparing prompts and models on 300 test cases using DeepEval metrics
- Ran model calls concurrently with asyncio and a semaphore; results stored in SQLite for regression tracking

Academics

B.Tech Computer Science, Example Institute of Technology | 2022 – 2026 | CGPA 7.1
