SUMMARY

CS undergraduate interested in AI agents.

TECHNICAL SKILLS

Python, pandas, LangChain, OpenAI API, scikit-learn, SQL

PROJECTS

LLM Evaluation Harness | Python, DeepEval, asyncio

- Built an evaluation pipeline comparing prompts and models on 300 test cases using DeepEval metrics
- Ran model calls concurrently with asyncio and a semaphore; results stored in SQLite for regression tracking

Inventory Management API | Python, Django, PostgreSQL

- Developed REST APIs with Django REST Framework for stock tracking across 12 warehouses
- Wrote unit tests with pytest and added Celery jobs for nightly stock reconciliation

EXPERIENCE

Data Science Intern, RetailCo | Jan 2024 – Jun 2024

- Built a churn prediction model with scikit-learn and pandas, presented insights to leadership

EDUCATION

B.Tech Computer Science, Example Institute of Technology | 2022 – 2026 | CGPA 7.7
